HIPAA Information and Consent Form

The Health Insurance Portability and Accountability Act (HIPAA) provides safeguards to protect your privacy. Implementation of HIPAA requirements officially began on April 14, 2003. Many of the policies have been *our* practice for years. This form is a "friendly" version. A more complete text is posted in the office.

What this is all about: Specifically, there are rules and restrictions on who may see or be notified of your Protected Health Information (PHI). These restrictions do not include the normal interchange of information necessary to provide you with office services. HIPAA provides certain rights and protections to you as the patient. We balance these needs with our goal of providing you with the quality of professional service and care. Additional information is available from the U.S. Department of Health and Human Services. We have adopted the following policies:

1. Patient information will be kept confidential except as is necessary to provide or to ensure that all administrative matters related to your care are handled appropriately. This specifically includes the sharing of information with other healthcare providers, laboratories, health insurance payers as is necessary and appropriate for your care. Patient files may be stored in open file racks and will not contain any coding which identifies a patient's condition or information which is not already a matter of public record. The normal course of providing care means that such records may be left, at least temporarily, in administrative areas such as the front office, examination room etc. Those records will not be available to persons other than office staff. You agree to the normal procedures utilized within the office for the handling of charts, patient records, PHI and other documents or information.
2. It is the policy of this office to remind patients of their appointments. We may do this by telephone, e-mail, U.S mail, or by any means convenient for the practice and/or as requested by you. We may send you other communications informing you of changes to office policy and new technology that you might find valuable or informative.
3. The practice utilizes a number of vendors in the conduct of business. These vendors may have access to PHI but must agree to abide by the confidentiality rules of HIPAA.
4. You understand and agree your inspections of the office and review of documents which may include PHI by government agencies or insurance payers in normal performance of their duties.
5. You agree to bring any concerns or complaints regarding privacy to the attention of the office manager or the doctor.
6. Your confidential information will not be used for the purposes of marketing or advertising of products, goods or services.
7. We agree to provide patients with access to them in accordance with state and federal laws.
8. We may change, add, delete or modify any of these provisions to better serve the needs of both the practice and the patient.
9. You have the right to request restrictions in the use of your protected health information and to request change in certain policies used within the office concerning your PHI. However, we are not obligated to alter internal policies to conform to your request.

"No Show" and "Cancellation" Policy & Procedure and Agreement

At Impact Family Chiropractic, our goal is to provide quality Chiropractic care in a timely manner. We have implemented a no show and cancellation policy which enables us to better utilize available appointments for our patients in need of care.

- **No Show Fee (Patients who fail to attend a scheduled appointment time): $50.00**
- **Cancellation Fee (Patients who fail to reschedule or cancel their appointments with 24-hour notice): $35.00**
- **These fees are not covered by insurance and is therefore the sole responsibility of the patient.**

How to Cancel or Reschedule your Appointment: Call the office at 919-977-5744. If you do not speak to our staff directly, please leave a message with your Name, Number, Appointment time, the time you called, and we will get back to you as soon as possible. A message must be left.

My signature below acknowledges my agreement to the terms set forth and the HIPAA information and office cancellation policy.

INFORMED CONSENT TO CHIROPRACTIC SERVICES

To the patient: Please read this entire document prior to signing it. It is important that you understand the information contained in this document. If anything is unclear, please ask questions before you sign.

The nature of the chiropractic adjustment The primary treatment I use as a Doctor of Chiropractic is spinal manipulative therapy. I will use that procedure to treat you. I may use my hands or a mechanical instrument upon your body in such a way as to move your joints. That may cause an audible "pop" or "click," much as you have experienced when you "crack" your knuckles. You may feel a sense of movement.

Analysis / Examination / Treatment

As a part of the analysis, examination, and treatment, you are consenting to the following procedures:

Please Initial Each Line, Consenting to Care. No care will be rendered if this is not signed. Thank you .

___ Spinal manipulative therapy	___ Palpation	___ Vital signs
___ Range of motion testing	___ Orthopedic testing	___ Basic neurological testing
___ Muscle strength testing	___ Postural analysis	
___ Ultrasound	___ Hot/Cold therapy	___ Electrical Stim
___ Radiographic studies	___ Mechanical traction	___ Graston
___ Other (please explain)	___ Manual therapy	___ Medical Massage

The material risks inherent in chiropractic adjustment. As with any healthcare procedure, there are certain complications which may arise during chiropractic manipulation and therapy. These complications include but are not limited to: fractures, disc injuries, dislocations, muscle strain, cervical myelopathy, costovertebral strains and separations, and burns. Some types of manipulation of the neck have been associated with injuries to the arteries in the neck leading to or contributing to serious complications including stroke. Some patients will feel some stiffness and soreness following the first few days of treatment due to the adjustment, other therapies, or medical massage. We will make every reasonable effort during the examination to screen for contraindications to care; however, if you have a condition that would otherwise not come to our attention, it is your responsibility to inform us.

The probability of those risks occurring. Fractures are rare occurrences and generally result from some underlying weakness of the bone which I check for during the taking of your history and during examination and X-ray. Stroke has been the subject of tremendous disagreement. The incidences of stroke are exceedingly rare and are estimated to occur between one in one million and one in five million cervical adjustments. Any other complications are also generally described as rare.

The availability and nature of other treatment options Other treatment options for your condition may include; but are not limited to: Selfadministered, over-the-counter analgesics and rest; Medical care and prescription drugs such as anti-inflammatory, muscle relaxants and painkillers ; Hospitalization ; and Surgery. If you chose to use one of the above noted "other treatment" options, you should be aware that there are risks and benefits of such options, and you may wish to discuss these with your primary medical physician.

The risks and dangers attendant to remaining untreated: Remaining untreated may allow the formation of adhesions and reduce mobility which may set up a pain reaction further reducing mobility. Over time this process may complicate treatment making it more difficult and less effective the longer it is postponed.

DO NOT SIGN UNTIL YOU HAVE READ AND UNDERSTAND THE ABOVE. PLEASE CHECK THE APPROPRIATE BLOCK AND SIGN BELOW: I have read [ ] or have had read to me [ ] the above explanation of the chiropractic adjustment, medical massage, and related treatment. I have discussed it with *Dr. Danielle Vann* and have had my questions answered to my satisfaction. By signing below, I state that I have weighed the risks involved in undergoing treatment and have decided that it is in my best interest to undergo the treatment recommended. Having been informed of the risks, I hereby give my consent to that treatment.
